Country-Wise 963 Link Publication Register

All entries retained, country/state classified, clickable links, and two content-specific sentences for each hyperlink.

Generated: 07 May 2026 06:42 UTC

Source control totals from uploaded register: 963 total entries, 851 unique URLs, 938 PDF-extracted hyperlink occurrences, and 25 live web-search findings. This rebuild preserves all 963 entry numbers and all repeated links intentionally.

Audit method: every numbered entry was parsed from the uploaded 963-entry clickable register, classified by country, and, for US publications, by state where the publisher or television affiliate location could be identified. Utility, search, AI-indexing and report-management links are retained as audit trail items rather than treated as independent articles.
